

A FIRST IN
SPECIALIST BATHING

DELIVERING ENHANCED INFECTION CONTROL:

Gainsborough specialist baths – with unique integrated antimicrobial BioCote technology

For over 20 years BioCote has been proven to deliver 99.99% protection against harmful bacteria, mould and viruses. This trusted and established worldwide technology is now integrated into Gainsborough power baths and transfer seats – a pioneering first in specialist bathing for advanced infection control.

- Reduces the risk of cross infection
- Assists with meeting CQC hygiene targets
- Enhances bather and carer well-being and safety
- 24/7 protection for the lifetime of the bath – not a coating, integrated during manufacture
- Protects against Influenza H1N1, E.coli, Salmonella and antibiotic resistant CRO, CRE, VRE and MRSA
- Supports stain and odour prevention
- Increases bath durability

BIOCOTE PROTECTED BATHING:

the science behind a proven technology

What is a 'microbe'?

A 'microbe' is a microscopic living organism or microorganism. Microbes are very diverse including bacteria and mould.

What is 'antimicrobial'?

'Antimicrobial' describes something that can resist the growth of microbes including bacteria and mould.

Independently tested and approved by BioCote

BioCote protected products are subjected to regular quality control testing. Only products that demonstrate superior antimicrobial performance carry the BioCote brand.

Gainsborough Healthcare Group
Life enhancing bathing.

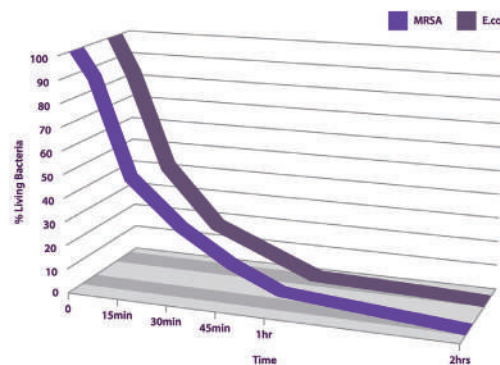

Harmful effects of microbes

- BATHER INFECTION
- CROSS CONTAMINATION
- CARER ILLNESS
- ODOURS & STAINS

Fast and effective, forever

BioCote starts to work immediately when in contact with microbes. Within less than 2 hours 99.99% of MRSA and E.coli bacteria is eliminated.

Integral protection, 24/7

Integral antimicrobial protection will not allow microbes to survive
