M3 CORPUS®

**YOUR CONFIDENT
DRIVE**

M3 CORPUS® – YOUR CONFIDENT DRIVE.

A formidable combination of chassis and seat.

The M3 Corpus follows your natural body movement, giving you a stable, more comfortable driving experience, so you can sit longer, reach further and do more.

The M3 Corpus sets a new standard for quality in a mid-wheel power chair. The combination of superb **Smooth** suspension, steering and seating offers you a complete solution to your mobility needs.

The Corpus seating system is completely customisable, and proven to help reduce the risk of users developing pressure injuries.

With the possibility of no less than five power seating functions, coupled with three programmable seat memories, your comfort and well-being is assured.

We offer a wide range of body supports and other accessories designed to help increase the amount of time you can sit relaxed in your chair and get more out of your day.

Our latest joystick features built-in BLUETOOTH® and infrared technology, which means that you can connect to your

mobile phone, control your tablet or PC and even connect to your home environment*, for example controlling the TV or turning the lights on and off.

*May require additional equipment in your home, not supplied by Permobil.

FEATURES

Smooth suspension

Smooth suspension provides superb comfort, stability and grip on slopes and obstacles, indoors and out. Simple and robust design with few parts is reliable and easy to service.

Active Height

All day long participation. Drive while fully elevated at up to 5 km/h, with full suspension functionality. This is the highest currently possible in a mid-wheel drive chair.

Active Reach

Up to 20° of forward tilt* can be used even when seat is fully elevated, enabling you to reach more of your world.

*Over 10° requires extra support.

BENEFITS

The M3 Corpus – revolutionising the power wheelchair – again

For 50 years, Permobil has been at the forefront of power wheelchair technology. And with our M3 Corpus, we've rethought what a mid-wheel chair can do, from the ground up.

With the M3 Corpus, we're ensuring that we provide the optimum solution for our users. We understand that it is important that driving is comfortable, intuitive and that chairs are programmable to match the user's needs.

We offer an unparalleled level of stability from the combination of the power base design, finely tuned suspension and three-point seat mount.

This stability enables us to move the Corpus seat forward, which means less chair in front of you, giving intuitive driving, better access to your world and greater independence.

The seating system supports the body ergonomically and ensures a comfortable seating

experience. You can use the seat to tilt and recline, both to provide a comfortable and relaxed position, but also to clinically ensure correct offloading of the body, reducing the risk of pressure injury.

ACCESSORIES

Seating and positioning ROHO® seat cushions

- » QUADTRO SELECT®
- » CONTOUR SELECT®
- » HYBRID ELITE®
- » ERGO AIR®

Permobil Original Supports

- » Head rests
- » Lateral supports

Anti-shear backrest.

A big plus with the Corpus® seat is its outstanding bio-mechanical backrest movement. Providing superb shear reduction and ensures a correct position change so your body can relax properly.

Corpus® Seating System.

Offers a range of powered seat functions with numerous clinical benefits.

Connectivity.

Bluetooth and infra-red technology built into joysticks, so users can control up to two PCs or tablets, and connect their home phone, TV – even turn the lights at home off and on. Connect to your environment!

Active Height seat elevation.

No more missing out on conversations. Drive while fully elevated at up to 5 km/h, with full suspension functionality. This is the highest currently possible in a mid-wheel drive chair.

Memory functions facilitate repeatable pressure-relieving positions and independent re-positioning mode (IRM).

An unparalleled level of stability.

Simple and robust design inspires greater confidence.

Anti-flutter design ensures smooth steering and stable straight-line driving performance.

Top speed
is 10 km/h.

Smooth suspension – providing a comfortable ride, 6 wheels in contact with the surface providing traction when driving.

Personalise the chair
with your favourite colour.
