

## Pro-Bario & Pro-Bario Max adjustable care beds from Nexus DMS

### Pro-Bario and Pro-Bario-Max

Electrically powered profiling beds for the heavier user in bariatric care

Safe Working Load (SWL): 41 Stones (260kg) Pro-Bario  
51 Stones (325kg) Pro-Bario-Max

Height range: 20cm to 60cm  
Lying Surface: 200cm x 120cm  
(optional 20cm extension - Pro-Bario only)

Pro-Bario is the lowest bariatric profiling care bed, with an adjustable height range of nominally 20cm to 60cm, minimising the risk of falls and enabling easier access to and from bed.

Two weight capacity options are available to suit user needs, and the bed's durable construction ensures maximum stability and support for the heavier user. Pro-Bario also features an innovative anti-tilt system, preventing distortion in the bed chassis over time and therefore prolonging its lifespan.

## Technical specification of Pro-Bario

### Easy to use

- 4 section mattress support
- Electrically adjusted height from nominal 20cm to 60cm
- Electrically adjusted back rest
- Electrically adjusted leg lift with Fowler position knee-break
- Electrically adjusted Trendelenburg/reverse function
- Simple 'lift & lock' siderails in attractive beech
- Head and foot boards in attractive beech
- Lifting pole and grab handle

### Convenient

- Easy two person assembly
- Modular for easy storage and transport
- Easily wheeled on transit/storage frame
- Powder-coated steel construction for durability & ease of cleaning
- Metal mesh mattress support prolongs life of mattress
- Standard bed size 200cm x 120cm. (20cm longer version of Pro-Bario also available). These are nominal inside dimensions. Mattress dimensions are less than this to allow clearance for moving parts of the bed
- Unique serial number on every bed for traceability

### Safe

- Auto-profiling/function-lock hand control as standard
- Innovative anti-lateral tilt system for total stability
- 4 braked twin-wheel casters
- Mains electricity safety connector
- Safe working load 260kg (41 stones) or 325kg (51 stones) for the Pro-Bario-Max
- Actuators/controllers ingress protected to IP54
- Securely fixed spiral wound cables
- CE marked to current EU standards

### A choice of accessories

- Matched medium to high risk pressure care mattress specifically for the heavier user
- Optima 'no-ripple' dynamic air-float mattress system
- Siderail height extenders in attractive beech (retains 'lift & lock' feature)
- Standard & extra large siderail safety foam bumpers
- lightEX reading/examination light
- easyEX movement aid. A special version is available for the Pro-Bario-Max bed
- crashEX safety mat
