Saturn Rotate Low™

AHSM-078 Rev 1.0 (08.11.24)

The **Saturn Rotate Low** is an electrically powered rotating profiling chair bed offering independence and mobility to weight bearing users, assisting them through the process of lying down to sitting up and then standing.

The **Saturn Rotate Low** is different to other beds in the Market Place as offers Innovative lateral support, assisting correct posture and aiding fatigue management. It is supplied complete with a mattress designed for users at 'High Risk' of developing pressure ulcers and is an ideal choice for reducing care costs whilst offering independence, dignity and quality of life to the user.

Saturn Rotate Low™

Featuring all the usual functions of a profiling bed, the **Saturn Rotate Low** also enables the user to rotate and then tilt the chair to aid in the transfer between standing and sitting. The auto-regression function ensures minimal pressure is placed on the sacral region when the bed is profiled, and the unique backrest provides greater lateral support. The **Saturn Rotate Low** includes a mattress designed for users at 'High Risk' of developing pressure ulcers. It features a vapour permeable, multi-stretch, high frequency welded cover, offering outstanding pressure reduction, comfort and ease of cleaning. A White Glove Delivery and Installation Service is available upon request.

★ Unique lateral support backrest

★ High quality motor with low noise level from TIMOTION

Once rotated, the bed behaves like a rise and recliner chair, assisting with the transfer between sitting and standing

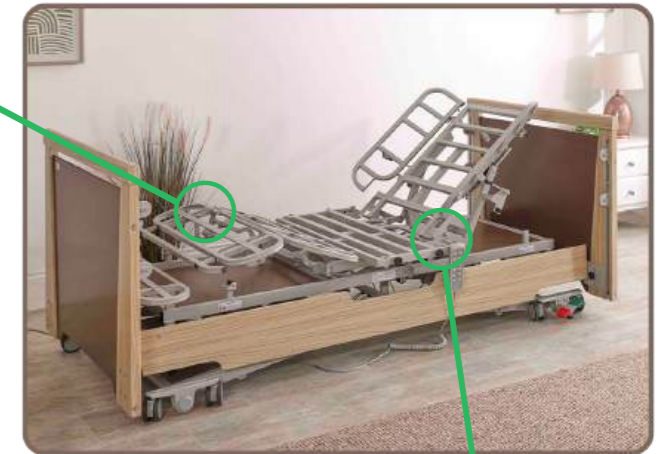

Includes a mattress designed for users at 'High Risk' of developing pressure ulcers, featuring a vapor permeable, multi-stretch, and high-frequency welded cover for enhanced durability and comfort

Comes complete with a set of bed sheets

Innovative lateral support backrest assists the upper body to help maintain a safe midline position and also assists with fatigue management

Handrails to assist with transfer on and off the bed

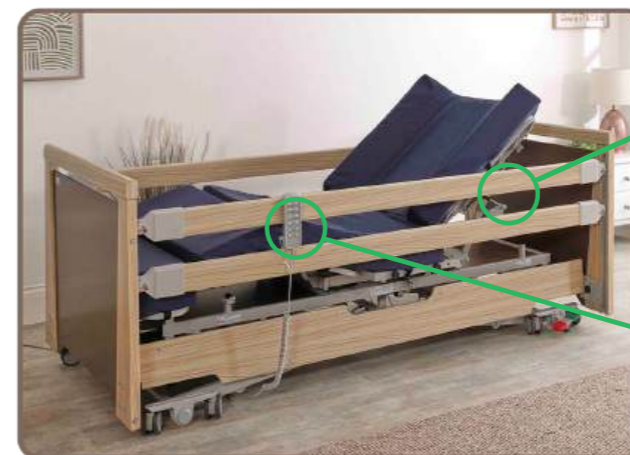

Electrically operated backrest, knee break, height, rotate and tilt

Auto-regression backrest

Profiled bed rotates through 90° to become chair (both left and right sided rotation is available)

Dual caster with central lock (caster diameter: 7.5 cm)

Optional aluminium side rails with quick release rail system (meet clause 201.9.8.3.3.3 of IEC 60601-2-52)

**should not be used when the bed is rotating

12 buttons hand controls with LED illumination for visually impaired
